

SPEAKER BIO

Business Futurist, AI Keynote Speaker, inventor, and former Futurist-in-Residence at Amazon, Jonathan Brill helps organizations turn disruption into opportunity. Drawing on decades of experience at the intersection of technology, innovation, economics, geopolitics, and organizational change, he helps leaders understand What Matters Next—and how to act on it before their competitors do.

As Executive Chairman of the Center for Radical Change, Jonathan leads teams of investigators and strategists who help Fortune 50 companies, governments, and global organizations identify emerging risks, opportunities, and inflection points before they become obvious. His work takes him from Silicon Valley to Shenzhen, Dubai, Kyiv, Panama, and beyond, helping leaders understand the forces reshaping industries, markets, and nations.

Jonathan has led innovation, intelligence, and strategy teams around the world, including serving as Head of Long-Term Strategy at HP. He advises senior executives, policymakers, and organizational leaders on navigating uncertainty, managing risk, and making better strategic decisions in rapidly changing environments.

Through his innovation labs, Jonathan and his teams have invented more than 325 products and generated over \$27 billion in new revenue across thirteen industries, including technology, manufacturing, finance, transportation, construction, real estate, and food. Much of that work has focused on applying AI, machine learning, computer vision, spatial data, and emerging technologies to create new products, services, and business models.

Combining futurist insight, invention expertise, and practical business frameworks, Jonathan delivers keynote presentations on the future of business, innovation, AI, leadership, and growth. Audiences leave with a clearer understanding of the forces shaping the next five years—and actionable strategies to innovate, adapt, and win because of them.

Jonathan is the author of *Rogue Waves* and *AI and the Octopus Organization*, Executive Chairman of the Center for Radical Change, and a columnist for *Psychology Today* on leadership and decision-making under uncertainty.
